

Port of Alaska MODERNIZATION PROGRAM

Industry Day

The Port of Alaska Modernization Program (PAMP) was created in 2014 to address the deteriorating conditions of Port of Alaska's marine facilities, including corrosion and loss of load-bearing capacity.

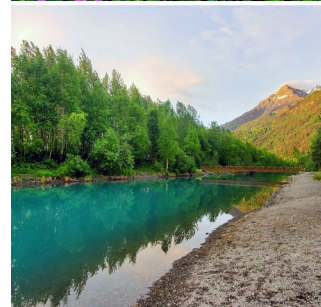

Join us!

October 17 & 18, 2023 | Anchorage, AK

Industry Day is a voluntary, pre-bid meeting that is intended to provide information to interested contractors for the upcoming Cargo Terminal 1 (or T1) project for Port of Alaska.

Port of Alaska, in partnership with the Municipality of Anchorage, is hosting Industry Day to:

- Explain the Municipal contracting process
- Describe the design and construction features of the project - including elements that are unique to working in Alaska and at the Port
- Solicit contractor input prior to the start of the procurement process
- Encourage construction companies to network and form teams
- Share the benefits of working with the Municipality and Port
- Get a flavor for what spending a little quality time in Alaska could mean for you and your employees
