Port operations continue throughout construction

T1 Construction Update

- Pile installation is now in full swing and moving south.

T1 Construction Update

- Concrete decking demolition of the POL1 has been completed and now piles are being extracted to finish the demolition.
- Terminal 1 demolition continues.

T1 Construction Update

- Deep soil mixing at the new Terminal 1 continues.
- Intertidal fill at Trestle 1B is nearly complete with armor rock installation.

Electrical Substation Project - North Extension Location

- Substation civil pad and BESS foundation construction will begin next week.
- Duct bank design submittal due mid-September. Construction planned for next year.
- Electrical 95% design submittal due late December.

North Extension Helipad Project

- Received multiple proposals. Under evaluation.
- Construction will be in 2027.

Terminal 2 Design

- 35% design received and under review
- Stakeholder review effort planned for October.
- Specifically looking at construction phasing to minimize disruption to operations.
- Special studies to help solve the issue of fuel berths availability during future Petroleum Terminal construction.

Upcoming meetings

- None at this time

A photograph of a port at dusk. A large ship is docked at a pier, with several cranes visible on its deck. The ship's lights are on, and the lights from the pier and surrounding area are reflected in the water. The sky is a mix of purple, pink, and blue, indicating the time is either dawn or dusk. The background shows a snowy hillside and some buildings. The text "Thank you" is overlaid in the center of the image.

Thank you
